

SCHOOL RE-ENTRY PLANNING

What we are doing NOW to prepare!

RE-ENTRY COMMITTEE

Comprised of administrators, teachers, nurses, technology staff & Board of Education members, this committee is addressing schedules, physical space, and technology needs to comply with social distancing guidelines.

PROTECTIVE EQUIPMENT PURCHASES

We have purchased items for the safety & protection of students and staff such as face masks, face shields, ThermoScan Thermometers, wall unit hand sanitizing stations, & Odorox air purification devices, as well as additional disinfecting & cleaning equipment.

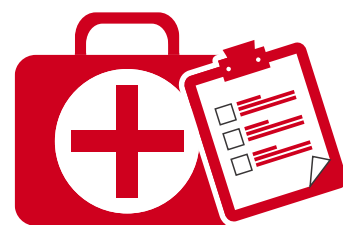

INCREASED SIGNAGE

Our school buildings will be outfitted with visual aids to help structure walking patterns and social distancing spacing and guidelines in addition to reminders on hand washing and encouraging healthy habits. These signs will be visible in hallways, common areas and in individual classrooms throughout the district.

EXPANDED ELEMENTARY NURSES OFFICE

The Elementary School Nurse's office suite now includes room 7 to allow for separate treatment and isolation areas which spreads out healthy and ill children. This will also allow for easier pick up procedures.

TRAINING FOR TEACHERS

Teachers will be trained using our Safe Schools program on Coronavirus Awareness and CDC guidelines for use of face coverings, cleaning & disinfecting workspaces and managing stress & anxiety with students.

REVISED POLICIES

New cleaning regiments, health office procedures and classroom practices will be in place for preventative measures against the spread of COVID-19.

[Watch our video "Sanitize" to see how we are using our Victory Electrostatic Sprayers to sanitize all surfaces in our classrooms & common areas.](#)
